Fairness in Winner-Take-All Competitions

Overview	
Title	Fairness in Winner-Take-All Competitions
Project	mmwinner
IDNo	mmwinner (agency: FAIR - Centre for Experimental Research on Fairness, Inequality and Rationality (NHH Norwegian School of Economics))
Producer/Owner	FAIR - Centre for Experimental Research on Fairness, Inequality and Rationality (NHH Norwegian School of Economics)
Funder	Centre of Excellence funding from the Research Council of Norway (2017–2026)
Distributor	FAIR - Centre for Experimental Research on Fairness, Inequality and Rationality (NHH Norwegian School of Economics)
Project Manager	Bertil Tungodden (NHH Norwegian School of Economics)
Active	False

Researchers

- Björn Bartling (University of Zurich)
- Alexander W. Cappelen (NHH Norwegian School of Economics)
- Mathias Ekström (NHH Norwegian School of Economics)
- Erik Ø. Sørensen (NHH Norwegian School of Economics)
- Bertil Tungodden (NHH Norwegian School of Economics)

Project description

This paper investigates fairness perceptions of extreme income inequality generated in winner-take-all competitions. Two large-scale experiments with more than 7,000 participants from the general population of the U.S. show that extreme earnings inequality is widely accepted, even when the winner only slightly outperforms the runner-up. The effect of the winning margin on inequality acceptance is modest compared to the effect of shifting the source of inequality from luck to winning by the smallest possible margin. The experimental choices are systematically associated with broader fairness attitudes and policy preferences, including support for higher taxation of top earners and redistributive economic policy.

2	Support	527	13.2%
3	Neither support nor oppose	1118	28.0%
4	Oppose	1040	26.0%
5	Strongly oppose	890	22.2%

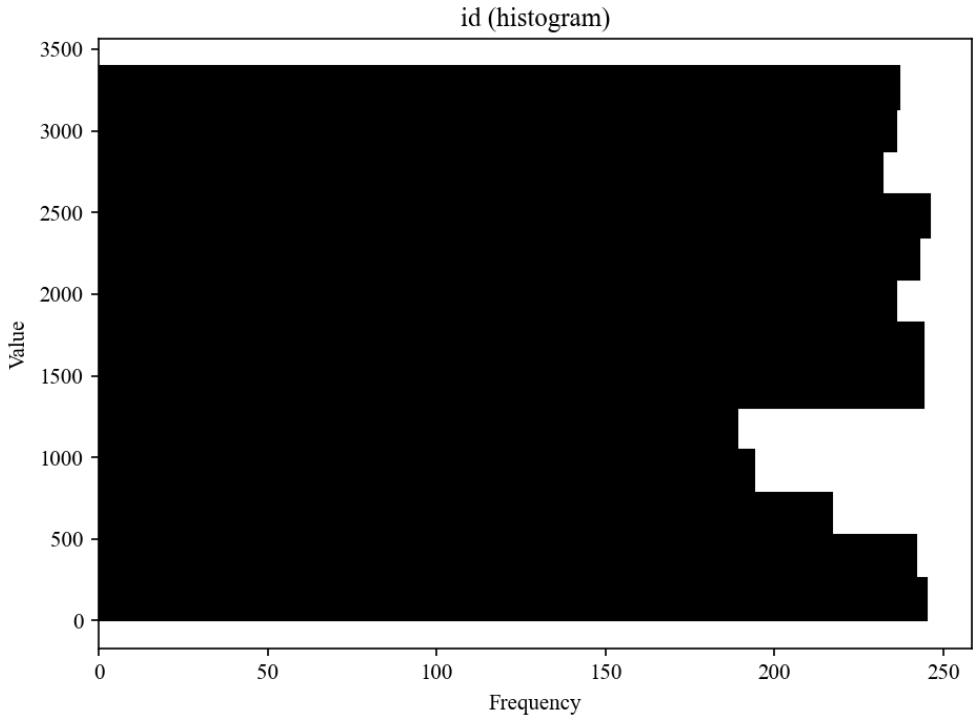
---

id, participant.id_in_session

Records unique identifier for each participant in the session for tracking and analysis purposes.

Question: participant.id_in_session

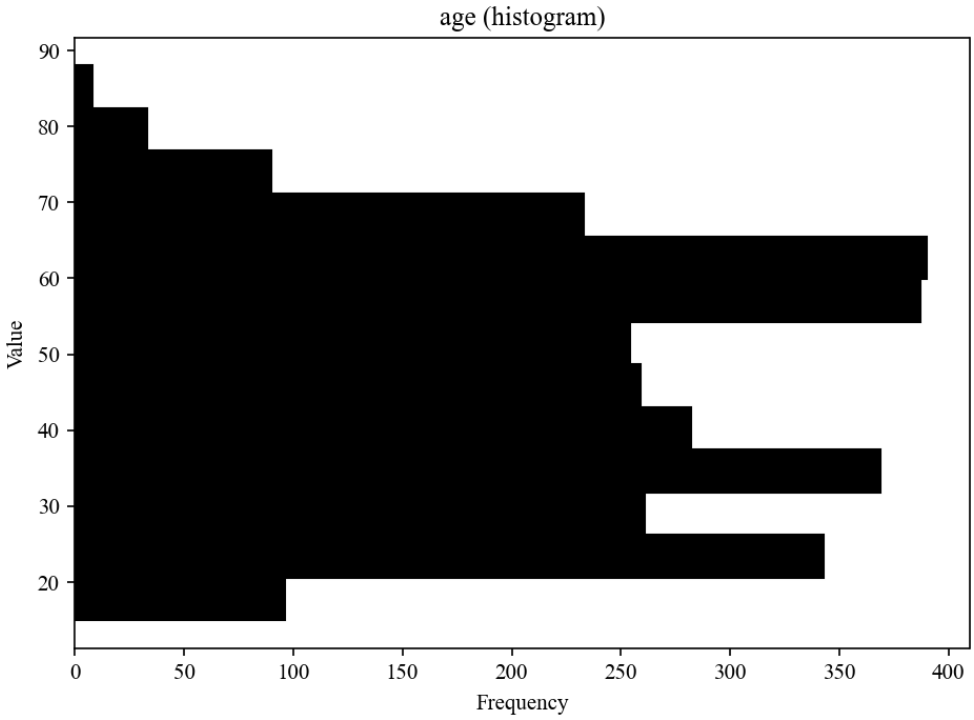
Statistic	Value	Statistic	Value
Valid	3005	Invalid	0
Min	1.0	Max	3394.0
Mean	1717.52	Std Dev	986.31



# sex, What is your gender?			
Indicates participant's gender, categorized as male, female, or other.			
Question: What is your gender?			
Statistic	Value	Statistic	Value
Valid	3005	Invalid	0
Min	1.0	Max	4.0
Mean	1.53	Std Dev	0.53
Value	Label	Cases	Percentage
1	Male	1461	48.6%
2	Female	1502	50.0%
3	Other	37	1.2%
4	Prefer not to say	5	0.2%

# age, How old are you?			
Records participant's age in years, providing demographic context.			
Question: How old are you?			
Statistic	Value	Statistic	Value

Valid	3005	Invalid	0
Min	15.0	Max	88.0
Mean	46.14	Std Dev	16.03



---

region, Where do you live?

Identifies geographical location of the respondent, indicating regional demographics.

Question: Where do you live?

Statistic	Value	Statistic	Value
Valid	3005	Invalid	0
Min	1.0	Max	4.0
Mean	2.57	Std Dev	1.00

Value	Label	Cases	Percentage
1	Midwest	612	20.4%
